LAMINAR PRODUCTS RESISTANT TO AGGRESSIVE CHEMICAL AGENTS

CLAIMS

1. The use of laminar products generated from swelled animal fiber material, consolidated using means such as drying or hardening, coated as the case may be on one or both sides with protective water-resistant films for producing devices, apparatus or garments, defined to protect the user from substances in the form of gas, vapor or fog that are harmful to health or poisonous.
2. The use of laminar products according to claim 1 in which the properties of foreign substances affecting the laminar products, such as binders, softeners, glue, gelatin, foreign fibers, as the case may be several foreign substances, have been incorporated.
3. The use of laminar products according to claims 1 and 2 which have been produced from swelled animal fiber material and have been treated and dried using deswelling means, such as tanning agents, curing fluids, curing gases.
4. The use of laminar products according to claims 1 to 3 which are made up of several layers, as the case may be intercalating intermediate layers, such as supporting films for example.
